## 5. Control and Slots

## 6. Setting up the Digital Picture Frame

- Open the package and remove the protective foam. Remove the protective sleeve from the unit.
- Plug-in the AC adaptor into power outlet. Plug the other end into the unit.
- After the content is stored on the target flash media, insert the media into the proper slot.
- Turn power to On position via the On/Off switch. The power switch is on the right side of the frame
- .As default, the first file in the card will be displayed first. The play sequence is automatically sorted by the file name alphabetically regardless of file type. Therefore, a MP3 could be played first, followed by a second MP3 or an image or video file.

## 7. Remote Control:
