

# INSTRUCTIONS

## 1. FIT TO TOILET

Adjust length of arm right size.

## 2. INSTALL LIGHTBOWL

Insert batteries ,right size arm to hang lightbowl on the rim of the toilet.

## 3. TURN OUT THE LIGHTS

Lightbowl only works in the dark,when it detects movement it will turn on and stay on for 2 minutes after last movement.(If the lights are on the lightbowl will stay off saving the batteries for when you need them most.)

## 4.SET A COLOR OR LET THEM ROTATE

Set the button to the OUT position to cycle colors.Press the button IN to set to a single color when desired color is visible.

## Note:

Your lightbowl will work best if the sensor is facing the door.Some locations maybe better than other as needed.

## HOW TO CLEAN

Wipe off with wet wipe,damp cloth or cleaner.Lightbowl is designed for daily indoor bathroom use only.(Do NOT immerse in water or place directly under running water.)
